Introduction

1

This publication presents statistics on labour market policy (LMP) interventions implemented by EU Member States and Norway in 2013, together with time-series for key variables covering the period 2001-2013. The paper is divided in four chapters.

Chapter 1 is introductory. Chapters 2 and 3 deal respectively with data on expenditure and participants in LMP interventions and include tables of indicators used for monitoring the EU Employment Guidelines. Chapter 4 includes tables of external and reference data that help to put the LMP data into context.

All data and other information in this publication are presented in accordance with the LMP Methodology 2013¹ (see point 1.3 below).

1.1 Scope of LMP statistics and key concepts

LMP statistics cover labour market interventions which are public interventions in the labour market aimed at reaching its efficient functioning and correcting disequilibria. LMP interventions are distinguished from other general employment policy interventions in that they act selectively to favour particular groups in the labour market. The primary target groups in most countries are those people who are registered as unemployed by national Public Employment Services (PES) or who are currently employed but at risk of involuntary job loss due to difficult economic circumstances for their employer. However, policy objectives at European and national levels are increasingly focused not only on these groups but on a wider range of people facing disadvantages and barriers that may prevent them from joining or re-joining the labour force – for example, women re-entering work after a family break, young people looking for their first job, older workers and disabled workers. Therefore, people currently considered as inactive but who would like to enter the labour market are also treated as an important LMP target group.

National interventions are classified according to a single scheme in order to ensure that the information on LMP interventions undertaken across Europe is presented in a way that is as consistent and comparable as possible. LMP interventions are classified by type of action, which refers to the way in which an intervention acts to achieve its objectives. The classification identifies three broad types of intervention – services, measures and supports – and 8

categories². LMP services cover all services and activities of the Public Employment Services (PES) together with any other publicly funded services for jobseekers. Services include the provision of information and guidance about jobs, training and other opportunities that are available and advice on how to get a job (e.g. assistance with preparing CVs, interview techniques, etc.). The classification scheme includes one category of LMP services:

- Labour market services (cat. 1)

LMP measures cover interventions that aim to provide people with new skills or experience of work in order to improve their employability or that encourage employers to create new jobs and take on unemployed people and other target groups. Measures include various forms of intervention that "activate" the unemployed and other groups by obliging them to participate in some form of activity in addition to basic job search, with the aim of improving their chances of finding regular employment afterwards. They are mostly short-term and temporary actions but on-going support for jobs that would otherwise not be sustained in the regular labour market is also covered.

The classification scheme identifies five categories of LMP measures²:

- Training (cat. 2)
- Employment incentives (cat. 4)
- Supported employment and rehabilitation (cat. 5)
- Direct job creation (cat. 6)
- Start-up incentives (cat. 7)

LMP supports cover financial assistance that aims to compensate individuals for loss of wage or salary and to support them during job-search (i.e. mostly unemployment benefits) or which facilitates early retirement for labour market reasons.

The classification scheme includes two categories of LMP supports:

- Out-of-work income maintenance and support (cat. 8)
- Early retirement (cat. 9)

For each intervention, data on expenditure and participants are collected. Expenditure is broken down according to a two tier scheme, which distinguishes firstly the direct

recipient of the transfers and then the type of expenditure involved. The numbers of participants in LMP interventions are recorded using three observations: stock, entrants and exits. Stock data (annual average) refer to the average number of persons participating in an intervention at a given moment during the year and are usually calculated from the administrative data as an average of the stock at the end of each month. The annual average stock can also be interpreted as the number of person-years of participation in an intervention. Flow data describe the number of people joining (entrants) or leaving an intervention (exits) during the year.

1.2 EU employment policy and LMP indicators

LMP statistics are one of the data sources for monitoring the EU Employment Guidelines through the Europe 2020 Joint Assessment Framework (JAF)³. The JAF is an indicator-based assessment system developed and used by the European Commission (Directorate General for Employment, Social Affairs and Inclusion) and the Employment Committee (EMCO). Organised in 12 Policy areas (PA), the JAF includes a series of indicators used to monitor the progress towards EU headline targets and related national targets in relation to the implementation of the Employment Guidelines. In each policy area, indicators are categorised as overall indicators, sub-indicators, and context indicators. The logic of the JAF is that, in principle, under each policy area the sub- and context indicators should reflect factors that explain and drive the outcome of the overall indicator.

Six indicators related to LMP fall within policy area 3 - Active labour market policies (PA3):

- PA3.S1 (sub-indicator) Expenditure on ALMP per person wanting to work (see Table 2.1.4): Expenditure on LMP category 1.1.2 (Individual case management)⁴ and LMP categories 2-7 divided by the number of persons wanting to work (ILO unemployed plus labour reserve).
- PA3.S2 (sub-indicator) Expenditure on ALMP as a % GDP (see Table 2.1.3): Expenditure on LMP category 1.1.2 (Individual case management)⁴ and LMP categories 2-7 as a percentage of GDP.
- PA3.S3 (sub-indicator) Activation (see Tables 3.3.1 – 3.3.3): Stock of participants in regular activation measures (LMP categories 2-7) divided by the number of persons wanting to work (ILO unemployed plus labour reserve).

- PA3.C1 (context indicator) Activation of registered unemployed (see Tables 3.3.4 - 3.3.6): Stock of participants in regular activation measures (LMP categories 2-7) that were previously registered unemployed divided by the stock of registered unemployed plus the stock of participants in regular activation measures that were previously registered unemployed and whose unemployment spell is broken by participation in a regular activation measure.
- PA3.C4 (context indicator) Activation of long-term (registered) unemployed (see Tables 3.3.7 - 3.3.9): Stock of participants in regular activation measures (LMP categories 2-7) that were previously long-term registered unemployed divided by the stock of long-term registered unemployed plus the stock of participants in regular activation measures that were previously long-term registered unemployed and whose unemployment spell is broken by participation in a regular activation measure (long-term unemployed = 12+ months for adults (25+) and 6+ months for youth (<25)).
- PA3.C6 (context indicator) Timely activation (see Tables 3.3.10 - 3.3.12): The proportion of entrants in regular activation measures (LMP categories 2-7) or assisted activation programmes (LMP sub-category 1.1.2) taken up by persons not yet long-term unemployed (Target value 100% = full compliance): $(A-B)/A$ % where A = Total entrants, B = Long-term unemployed entrants (12+ months for adults 25+ and 6+ months for youth <25).

Two further indicators related to LMP fall within policy area 4 - Adequate and employment oriented social security systems (PA4):

- PA4.1.S1 (sub-indicator) Expenditure on LMP supports per person wanting to work (see Table 2.1.4): Expenditure on LMP category 8 (Out of work income maintenance and support) divided by the number of persons wanting to work (ILO unemployed plus labour reserve).
- PA4.1.S2 (sub-indicator) Expenditure on LMP supports as % of GDP (see Table 2.1.3): Expenditure on LMP category 8 (Out of work income maintenance and support) as a percentage of GDP.

1.3 Guiding remarks on data

Source of data and timeliness

Unless otherwise specified, all data presented in this publication were extracted from the LMP database⁵ on the 12th January 2016. Data are collected annually from administrative sources in each country. The publication

includes tables showing the original source of data on expenditure and participants for each intervention (see Tables 5.5 and 5.6).

Source codes in the form of internet hyperlinks are included after each table and figure in this publication to help readers access easily the most recent data available from the Eurostat website.

LMP Methodology

The LMP data collection is underpinned by a comprehensive methodology. It defines the scope of the data collection, the statistical unit and coverage, describes the classification system, and gives precise guidelines on the data to be provided. Users of LMP data are recommended to refer to this methodology in order to facilitate interpretation of the data provided in this publication. The methodology is available from the Eurostat website⁶. This publication includes the questionnaire used in the LMP data collections (see Table 5.1), the classification scheme by type of action (see Table 5.2) and breakdown by type of expenditure (see Table 5.3).

The LMP methodology is also used by the OECD. Data on LMP expenditure and participants published by the OECD in "Employment Outlook" for the EU countries and Norway are collected and carefully validated annually by the European Commission's Directorate-General for Employment, Social affairs and Inclusion before being sent, together with all related metadata, to the OECD. The only divergence between the two databases is in category 1 (Labour market services), where OECD prefers to maintain a different coverage and has, for some countries, either supplemented or excluded parts of the data.

Qualitative data

In addition to the quantitative data on expenditure and participants presented here, the LMP database includes valuable qualitative information describing each intervention, how it works, the main target groups, etc. These descriptions help to put the quantitative data into context and can be extremely useful for researchers. These qualitative data are compiled into a series of "Labour market policy statistics: Qualitative Reports" and produced as separate volumes for each country/year⁶. This publication includes a table expanding on any abbreviations used in intervention names and explanatory notes to the quantitative data reported by each country (see Table 5.4).

Coverage

In accordance with the LMP methodology, the data presented in this publication should cover all LMP interventions in each country including those of autonomous regions, which may be significant. There are, however, some known exceptions:

Germany: The Länder (regional authorities) carry out some important LMP activities independently of the federal actions but insufficient data are available to report on these in any detail. However, many of the activities of the Länder are supported by the ESF (European Social Fund) and the LMP data for 2000-2006 include a single entry (DE-84) covering this expenditure and the related participants. Unfortunately changes to reporting procedures for the 2007-2013 ESF funding period mean that the data on ESF expenditure relevant to LMP in Germany are no longer available. The data for Germany for 2007-2013 are therefore missing the expenditure and participants related to LMP activities of the Länder. In 2006 the ESF support for these actions accounted for 7.4% of the expenditure on LMP measures (categories 2-7) in Germany and 29.6% of the participants.

Spain: Data for reference years prior to 2013 do not provide complete coverage of the activities of municipalities and do not cover all of the autonomous regions. Spain recently made significant efforts to improve coverage and address the gaps in the LMP data for 2013.

Cyprus: Data for 2013 were delayed and not available at the time this publication was prepared. LMP data for 2013 will be submitted together with those for 2014 and published as soon as possible.

United Kingdom: Data for 2011 - 2013 were not provided.

Aggregates of expenditure and participants

Aggregates of expenditure data are only provided when values are available (or known to be not significant) for all constituent items.

However, participant data are generally less complete and in order to increase the number of participant aggregates that can be disseminated, the value of a participant aggregate is shown provided that constituent data are complete for at least 80% of the associated expenditure

(completion indicator $\geq 80\%$). All aggregates of participants based on incomplete data are flagged as "u" to alert users that the data are not fully reliable (i.e. may be understated by up to 20%) and this flag always takes precedence over any other flag that might be applicable.

EU totals

EU totals are completed only when data are available for all countries or when Cyprus, Luxembourg and Malta are the only countries with incomplete data. If data for a country is missing for one year then EU totals may be completed using data from the previous year for that country.

The following aggregations should not be made for methodological reasons:

- Participants in category 8 should never be added to those in categories 2-7.
- Participants in category 1 should never be added with any other category.

Double counting may occur legitimately when a person participates in more than one intervention at the same time or is counted in two components of a mixed intervention – for example when training allowances are paid independently from the provision of training services. All known cases of double counting are taken into account by appropriate adjustments, which are shown in the detailed tables of participant data (section 3.4).

Flags

LMP data are flagged at the intervention level. The following flags may be applied:

- b Break in series
- e Estimated data
- n Not significant
- p Provisional data

2. Note that since the 2013 LMP methodology was introduced category 3 has been merged into category 4 (as sub-category 4.3) and is no longer used as a top-level category.

3. <http://ec.europa.eu/social/BlobServlet?docId=6440&langId=en>

4. At the present time data for LMP category 1 are not fully broken down by sub-category for all countries. Therefore the indicator can only be calculated for categories 2-7.

When data are aggregated (e.g. to category totals or to EU aggregates), the various constituents of the aggregate may have different flags but only one can be applied to the final value. The following rules are applied to determine the flag (if any) to be applied to aggregates. Firstly, the flag most applicable to an aggregate is considered to be the one that applies (at detailed level) to the highest share of the aggregate value. Secondly, a flag is only applied to an aggregate if it affects more than 10% of the total value.

Intervention names

The names of all LMP interventions are shown here in English only. However, for research purposes it may also be helpful to know the name of the intervention in the national language. An inventory of intervention names in both English and national language is included in the LMP Qualitative Reports which are published separately for each country.

LMP expenditure at constant price levels -

The price index for household and NPISH (non-profit institutions serving households) final consumption (2005=100) was used as deflator (see table 4.1.2, source: National Accounts).

Persons wanting to work – definition

Persons wanting to work are defined as the unemployed plus the labour reserve. The unemployed according to the ILO definition are persons without work, currently available for work and actively seeking work. The labour reserve covers inactive persons who want to work but are either not actively seeking work or are not immediately available for work, i.e. it is a subset of all inactive persons (persons neither employed nor unemployed). Data are taken from the EU Labour Force Survey (EU LFS)⁷.

Notes

- 1 Excludes the budget of the actual PES centres which are under the control of the Danish local authorities.
- 2 The financing is (partly) covered by the State/Central government accounts
- 3 The breakdown of expenditure by type of benefit (full-time, part-time or partial) is not known so all expenditure is shown as full-time benefits, which are the most important.
- 4 Data cover only recipients of early retirement pay coming directly from unemployment, which corresponds to around 40% of all recipients.

Notes

- 1 Includes ESF contribution.
- 2 This intervention is gradually being replaced by the structures implementing the new CSP contracts (FR-117).
- 3 Expenditure is already included under FR-102 (Pôle emploi).
- 4 Intervention coming to an end.
- 5 This intervention regroups training courses organised by the Regions. Some trainees receive the AREF (FR-63).
- 6 Some participants may continue to receive unemployment benefits which are reported under category 8.
- 7 One component of the expenditure (the back-to-work grant) is coming to an end.
- 8 A small share (1.7%) of expenditure reported in FR-3 is in fact paid to unemployed people creating their own business (FR-38).
- 9 Data also include the APLD allowance (partial activity of long duration).

Notes

- 1 Expenditure includes reimbursement of travel and moving costs incurred by participants. The share of the PES operational costs is now included in FI-56.
- 2 Share of operational costs of the PES based on monitoring of staff time-use.
- 3 The expenditure is significantly reduced compared to 2010 because registration is not an individual action anymore but is part of the other category 1 services.
- 4 These costs have not been divided into the different services as for earlier years which explains the significant increase in expenditure.
- 5 This new intervention replaces FI-49 Job clubs.
- 6 Includes ESF contribution.
- 7 The significant change in both expenditure and participants is still the result of the extension of the eligibility criteria which occurred in 2010.
- 8 Intervention coming to an end.
- 9 Expenditure includes only subsidies paid by the Ministry of Employment and the Economy to facilitate the recruitment of unemployed persons as apprentices.
- 10 Expenditure refers to persons on leave and includes both income support (80/70% of unemployment benefit entitlement) and training supplements where appropriate.
- 11 Data represent an estimate of public funding for sheltered workshops. Income from business activity, which accounts for more than half of revenue, is excluded.
- 12 Expenditure includes rehabilitation allowances and the costs of different rehabilitation activities.
- 13 Unemployment benefits paid to recipients participating in measures are not included here, they are reported under the appropriate measures (under categories 2-7).
- 14 There is a significant change both in expenditure and participants as the target group is shrinking (the eligibility criteria is based on the year of birth).

Notes

- 1 The breakdown of recipients by type of benefit (full-time, part-time or partial) is not known so all are allocated to full-time benefits, which are the most important.
- 2 Data cover only recipients of early retirement pay coming directly from unemployment, which corresponds to around 40% of all recipients.

Notes

- 1 This intervention is gradually being replaced by the structures implementing the new CSP contracts (FR-117).
- 2 Participants are counted under FR-94 to FR-96 and FR-126.
- 3 According to Eurostat recommendations, participant data of FR-94, FR-95 and FR-96 are reported under FR-116 (R,2).
- 4 FR-94, 95 and 96 are progressively being replaced by interventions currently included under FR-126.
- 5 Intervention coming to an end.
- 6 Beneficiaries of training allowances are already counted in interventions FR-85 and FR-118.
- 7 Beneficiaries of training allowances are already counted in other training interventions (FR-70, FR-71 and FR-85).
- 8 Participants of FR-106 are included in FR-63.
- 9 Stock: average of two year-end figures.
- 10 All beneficiaries are already counted in other training measures (FR-70 and FR-71).
- 11 Double counting with FR-70, FR-71 and FR-104.
- 12 Participants of FR-11 and FR-104 are included in FR-118.
- 13 Participants of FR-11 are included in FR-118. Some participants of FR-104 are double counted with those reported in FR-118.
- 14 Data cover only apprenticeship contracts concluded with low-qualified youth (56.4% of all contracts) for which employers receive recruitment incentives.
- 15 Adjustment for double-counting: FR-63, FR-104, FR-106 and FR-107.
- 16 Most participants are already included under other interventions in categories 4, 6, 7 or 8.
- 17 Double-counting with FR-38.
- 18 Stock: end-year figure.
- 19 All participants in FR-121 and 84% of participants in FR-122 are already reported in FR-38.
- 20 The entrants for the "Pension equivalent allowance" were interrupted on 1st January 2011 and later resumed on 1st July 2011 under the title "Transitional solidarity allowance".

Notes

- 1 90% of the stock of participants in NL-64 are also reported under NL-33.
- 2 Stock: end-year figure.
- 3 Participants of NL-32 are reported under NL-31.
- 4 Intake for the VLW ended in 2003 so that the 4-year subsidy for entrants up to that time ended in 2006 and there are no longer any participants for this component.
- 5 Participants receiving unemployment insurance/assistance in NL-31 and 33 that are already counted in NL-52 and 64.
- 6 Entrants = exits because grant is renewed annually.

Notes

- Data includes distinct activities: placement and technical supports. In placement, the unemployed become employed, In technical supports the status does not change. Data on unemployment by duration is not complete (only data from IEFP).
- All participants in components 2 were participants in component 4 too. Participants in component 4.1.1 are not include in total in order to avoid double counting.
- Intervention coming to an end.
- Stock data does not include figures from IGFSE (IGFSE data on entrants are 38% of total and data on exits are 17% of total).
- Stock data is incomplete (includes only data from IEFP). However, data from IEFP means 97% of total of entrants and 92% of total of exits.
- Entrants: total beneficiaries (new starts plus end-year stock).
- Data on stock is not complete (only data from IEFP and OSEC). Data from IGFSE are 51,9% of entrants and 75,1% of exits.
- Intervention not applied in 2013.
- Mixed intervention (categories 4 and 7). A breakdown of participants by component is not possible. All participants are recorded in category 4, which is the most important.
- A small number of participants cannot be accurately allocated between interventions PT-29, 31 and 37. Participants by intervention may therefore be slightly under or over-stated but the total for the three is correct.
- Breakdown by subcategory is not available. However, according to the estimates, almost 100% of participants are beneficiaries of subcategory 4.1.2. Therefore all participants were included in subcategory 4.1.2. Stock: start-year figure.
- Data do not include 12849 beneficiaries because their participation is not under PES control. These data are not available.
- Stock: end-year figure.
- Data on exits are provisional for 3 years because participation can be suspended for 3 years.
- Stock = total beneficiaries in the year.

Notes

- 1 Data on participants are reported separately in FI-57 (R.2).
- 2 Data on participants are reported separately in FI-58 (R.2).
- 3 This new intervention replaces FI-49 Job clubs.
- 4 The significant change in both expenditure and participants is still the result of the extension of the eligibility criteria which occurred in 2010.
- 5 Intervention coming to an end.
- 6 Stock: end-year figure.
- 7 Entrants: total beneficiaries (new starts plus end-year stock).
- 8 Stock figures are estimated on the basis of the duration of participation in 1997 and change in total beneficiaries during the year and therefore of limited reliability.
- 9 Recipients participating in measures (categories 2-7) are not included here.
- 10 There is a significant change both in expenditure and participants as the target group is shrinking (the eligibility criteria is based on the year of birth).
